

Nubian Water Systems names Luke Chamberlain and Nicole Beckman as Water Engineers to continue innovating

Sydney, 16 November 2011: Responding to increasing homeowner and commercial sector interest in greywater recycling, Nubian Water Systems – Australia’s leading greywater recycling technology provider - has appointed two specialist engineers, Luke Chamberlain and Nicole Beckman.

Nicole and Luke bring local and international expertise to their roles in helping Nubian develop domestic, development-scale and commercial greywater recycling projects, as well as looking to the continuous improvement of Nubian’s technological and operational capacity.

Luke Chamberlain, Water Engineer, comes to Nubian as a skilled drainage engineer and hydraulic modeler with seven year’s professional experience in his native UK. Luke’s track record includes managing wastewater and drainage projects for leading UK water company, Severn Tret Water. In particular, Luke worked on projects involving private developers – and, as a consequence, has developed particular expertise in developing projects that deliver a clearly commercial return on investment.

Nicole Beckman, Water Engineer, brings extensive experience as an environmental engineer with deep expertise in wastewater and greywater designs. Nicole previously worked as the Customer Service Officer at Todae Environmental. In her time there, she managed all aspects of day to day operations and developed a deep understanding of environmental systems. Nicole has also been actively involved in various sustainability projects including designing and constructing greywater treatment marsh for end use irrigation of CCAT facility.

CEO of Nubian, Barry Porter comments, “Nubian is experiencing growing interest from both homeowners and the commercial sector for technologies that help reduce their overall water consumption. Our greywater systems, which reduce water use by up to 50%, are an easy to install, reliable and cost-effective option for these customers. With this in mind, we are delighted to have Luke and Nicole join Nubian, working as part of the team to constantly strengthen our technological capabilities, as well as our capacity to respond to customer demand.”
